

## Meet Your Candidate

*Peyton Hubble*

I am dedicated to educating the public and spend many hours each week creating engaging environments for my clients to learn about real estate. I pride myself on working with transparency and integrity for both clients and customers. Whether I am guiding a potential buyer through the process from start to closing or providing a potential seller with a professional CMA, I am more than happy to assist anyone who asks for it. Apart from real estate, I am a mother to a lovely little boy and work as a bartender a couple of days a week at a local restaurant by the river. I have a passion for nature and enjoy spending time outdoors exploring and learning about our local flora. In my free time, I also like experimenting with new recipes using the local flora. As a realtor, you never know when you might have to start foraging and eating the weeds from your yard!
